

The diagram illustrates the relationship between riparian limits and aspen groves. A vertical line marks a 25-foot clearing limit. To the left of this line, the area is labeled 'RIPARIAN LIMITS & ASPEN GROVES'. To the right, a note states: 'Clearing Limit Varies for Vertical and Horizontal Limits according to Maintenance Level'. The diagram shows a river on the left, a road in the center, and various vegetation types (trees, shrubs, grasses) on the right. The riverbank is shown with a dashed line indicating the water's edge. The road is a solid line. The vegetation is represented by various symbols: large trees with cross-hatching, smaller trees with solid black outlines, and grasses with wavy lines.
